1.1	Safety rules on chemistry lessons/ Zasady bezpieczeństwa na lekcjach chemii			
Summary (book, page 11)				
<ul style="list-style-type: none"> Each reagents in a chemistry laboratory must be legibly labeled. If necessary – with appropriate hazard symbols. 				
<ul style="list-style-type: none"> Essential safety and health information on chemical substances can be found in Chemical Safety Cards. 				
<ul style="list-style-type: none"> All experiments must be carried out in special laboratory glassware as well as conducted with appropriate laboratory equipment. 				
<ul style="list-style-type: none"> While doing experiments one must distinguish between <u>observations</u> and <u>conclusions</u>. The former describe information we gather by using our senses, the latter link the observations with scientific knowledge.
